

Arantys Value Insights

Commodity trading companies are not like ordinary trading firms. They are companies that are able to connect price fluctuations in futures trading to the logistical handling of the goods.

Optimizing this process is their ultimate challenge.

All of our customers, regardless of their industry, share underlying challenges that are remarkably similar.

Arantys integrates all your trading, logistics, financial and risk management processes. You can measure the added value of one integrated software solution in all your departments.

ARANTYS

COMMODITY TRADING
SOFTWARE

Which of these challenges resonates with you?

Below is a table of the key areas in which commodity trading companies, and companies with a commodity trade department are seeking to improve. Which of these Customer Challenges resonates with you? And how would the elimination of such challenges positively impact your margins?

	Customer Challenges	Arantys Solution	Key Results
Financial management	<ul style="list-style-type: none"> Using multiple systems causes unnecessary (rounding) errors and inefficient processes. 	Manage your finance and trade processes in one solution. Arantys features automated workflows for repetitive financial and treasury management processes.	<ul style="list-style-type: none"> Improved efficiency. Reduced administrative costs. Quick month-end close.
Trade & Risk Management	<ul style="list-style-type: none"> Financial, trade, logistics and manufacturing data comes from various non-integrated sources, making real-time insight in your position impossible. Inaccurate position reports result in suboptimal trades which heavily impact profitability. 	Arantys covers all financial, trade and logistics processes in one solution (no integration between 3rd parties). This results into a real-time, accurate position report with one click of a button at any time of the day.	<ul style="list-style-type: none"> Anticipate on market fluctuations immediately based on real time insights. Reduce trading errors by knowing your actual position at any given time. Maximize profitability by making the right trades based on your position.
Supply Chain & Logistics	<ul style="list-style-type: none"> Increased supply chain volatility. Uncertainty about supply & demand. Growing transportation costs. Lack of insight in how to improve logistical processes. 	Arantys provides an integrated view on logistical processes. Easily identify whether to link a sale to existing inventory or if purchases are required to match demand. Arantys supports transportation processes with multiple legs and loads.	<ul style="list-style-type: none"> Allocation optimization to get the best profit Choose the most cost-efficient transport option. Increase your margins by reducing transport costs.

	Customer Challenges	Arantys Solution	Key Results
Compliance	<ul style="list-style-type: none"> • Import & export documents need to be available at the right time. • Untransparent and manual Ultimate Beneficial Owner (UBO) registration process causes unnecessary risks. 	<p>Arantys comes with the necessary functionality to execute UBO registration and validation. Additionally, the system helps your team to ensure every document is available at the right place at the right time.</p>	<ul style="list-style-type: none"> • Automated UBO registration workflows. • Generate necessary supply chain documents with a single click. • Reduce risks.
Reporting & Insight	<ul style="list-style-type: none"> • Data is locked in different data sources. • Reports are not easily generated. • It's difficult to make data-driven decisions. 	<p>Arantys includes a complete platform for BI and Analytics. The solution is delivered with out-of-the-box interactive dashboards. Recognized as a 'Self-Service-BI' tool, the system allows users to easily make their own dashboards or run operational reports and queries.</p>	<ul style="list-style-type: none"> • Make data-driven decisions. • All your data in one integrated system. • Easily create dashboards, run queries & generate reports. • Reduced IT cost.
Manufacturing	<ul style="list-style-type: none"> • Difficulty tracking & tracing ingredient characteristics and origins. 	<p>Arantys offers the ability to (re) pack or blend the commodities you buy into the products that you sell with keeping track of the costs per lot.</p>	<ul style="list-style-type: none"> • Get a grip on your lot profitability: additional costs are added to the lot to give insight in the actual lot profit. • Track the manufacturing status of a lot to determine when it is available for sale.

Our Story

ERP systems have been available since the 1970's. Traditionally, Commodity Traders used trading and CTRM systems that were separated from ERP and required an interface. This resulted in (rounding) errors, lack of insight, low business agility and sometimes even business and trading downtime.

To overcome this, we created Arantys as the world's first integrated ERP and Commodity Trading (CTRM) solution. By combining trading, logistics, financial and risk management functionality into one solution, the risk of errors is significantly reduced whilst the level of insight is greatly increased. Our specialists have helped customers on all major continents to maximize profits by digitalizing their business using our platform.
